Topics

- Introduction
- Pre-processing
- Methodology
- Analysis

Introduction

- Image informatics have significant influence in medical imaging and includes:
 - Image segmentation
 - Tumour and other pathologies localization
 - Measuring tissue volume
 - Diagnosis and study of anatomical structures, etc.

Methodology

Image
enhancement

Segmentation

Post-processing

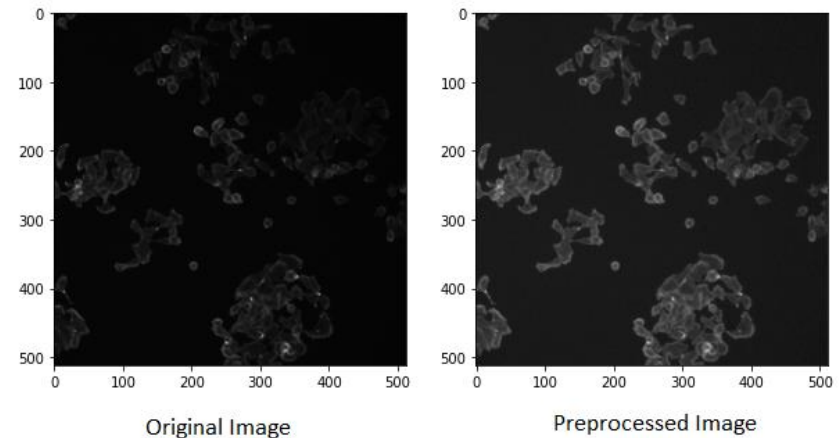

Comparative
analysis

Pre-processing

Methodologies

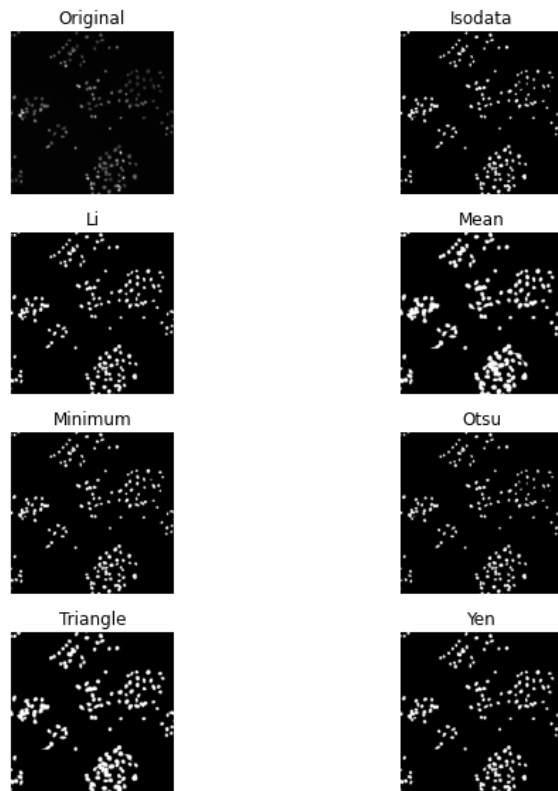

- Exponential
- Logarithmic
- Image normalization (rescale intensity)
- Gamma adjustment

Clustering

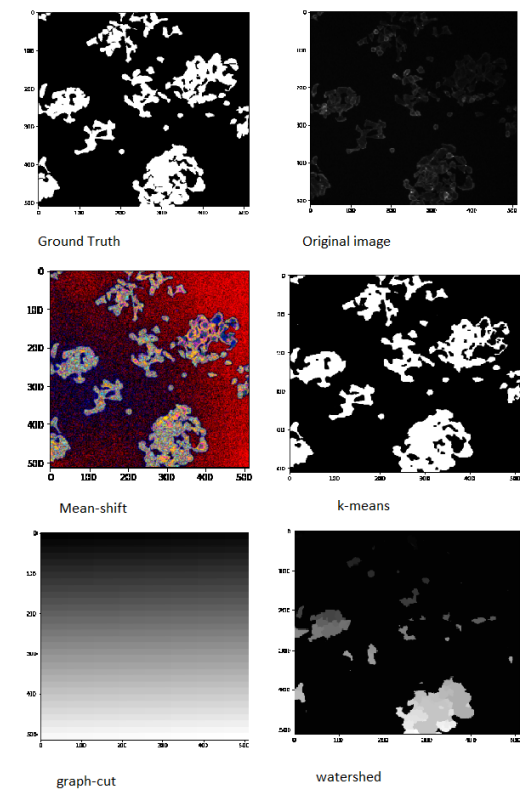

Segmentation

Thresholding

Clustering

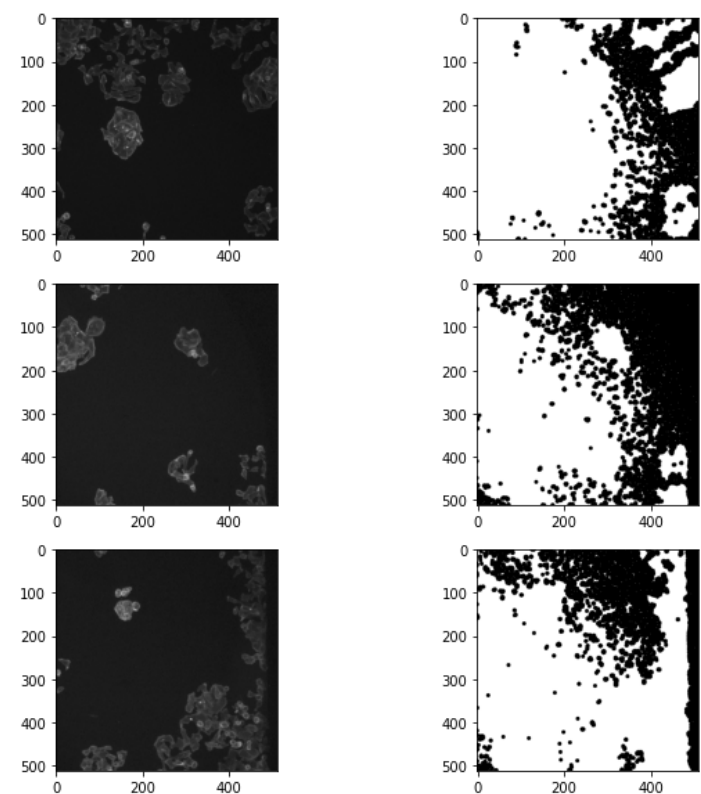

Post-processing

Failures

Denoising

Comparative Analysis

Cell Components	Best Segmentation Technique	Jaccard Score
Cytoplasm	Image enhancement + Mean thresholding	0.86
Nuclei	Image enhancement + Multi Otsu's thresholding	0.88

THANK YOU!
